

KLOVE serves my family and I by providing music, entertainment and news with a Christian perspective to us. We live in a remote area of Northern CA and this is the only station available to us which provides this valuable public service. If KLOVE were to be forced off the area in this community by a LPFM broadcaster providing other program there would be no other stations available to us that would provide modern contemporary Christian music and news. As a result we would not have an opportunity to receive the type of music that we prefer and would have to rely on other news sources which do not share our Christian values for information.

I believe that the service provided to this community and to many others across the nation is very valuable as it is a clear voice that shares the beliefs and values of many Christians. Its programming provides needed information and inspiration to its listeners 24/7. In many areas such as ours it is the only Christian radio station available.
